Dear Siomochka:

Many things have happened during this 2014 year.

Our activity was even higher than last year: 9 articles are published. All the papers which I have written are dedicated to you, and in one you are the coauthor. You started this article and did not finish. I wrote to your E-mail every day but never received an answer.

From 9 published articles, 3 were dedicated to Siomochka and in one he was a coauthor.

This year two my grandsons marry during 2 months. These are the photos:

Dear Shela,

Sioma is certainly happy at that better world and still supports all of us, his relatives and his friends.

So be calm about him. It would be better for us if he had lived, but I think he fulfilled his life’s mission well and won.

With love

Zenon

Dear Shela

Yes we all miss him, he had contributed so much to science and definitely to our career. He is in your heart and all of our group. Take care, with love always
